Tudo Azul

Technical Rider 2026

Tudo Azul is a six-piece band combining Brazilian music with jazz.
The standard sextet lineup consists of:

1. Vocals
2. Flute
3. Guitar (acoustic guitar and electric guitar)
4. Piano
5. Electric bass
6. Drums / percussion / occasional vocals

Performances in smaller lineups are also possible.

Sustainability is very important to the band, which is why we usually travel in a single car. The following equipment is usually transported by the band: Flute, Guitars, Electric bass, Cymbals. Bass drum pedal, Snare drum. Small percussion, Vocal microphones.

The singer prefers working with her in-ear monitoring system, for which one monitor mix should be reserved (see below).

To keep travel costs as low as possible, the organizer is ideally asked to provide the following backline:

- **PA system, monitors, mixing console**
- **2 microphones for vocals, 1 microphone for flute**
- **Additional microphones for the other instruments (depending on stage size)**
- **Amplifiers (electric guitar amp, bass amp, and if necessary an amp for acoustic guitar)**
- **Piano (preferably a grand piano, though a stage piano is also possible)**
- **Drum kit (bass drum, 2 toms, hardware)**

Please contact us if any required equipment cannot be provided:

Additional Backline Information

PA System

The sound system should be appropriate for the size of the venue and consist of a separate Hi/Mid and Sub system.
It should be fully set up, calibrated, and tested before the production crew arrives.

Monitoring

For larger stages we require:

- 3 wedges + 1 drum fill

Monitor Mixes

- **Mix 1** – Vocals via in-ear monitoring system
  (Xvive U4 Ear Monitor Wireless System with XLR or jack connection)
- **Mix 2** – Vocals and flute
  (in front of flutist / 1 wedge)
- **Mix 3** – Piano
  (center-left / 1 wedge)
- **Mix 4** – Guitar
  (center-right / 1 wedge)
- **Mix 5** – Drums and bass
  (rear-center / 1 drum fill or wedge)

(All position references are from the perspective of the FOH engineer/audience.)

For smaller stages and clubs, two monitors are often sufficient for vocals, flute, and acoustic guitar, plus one monitor mix for the singer's in-ear monitoring system.

Mixing Console

The mixing console should provide at least 14 free channels and EQs.

Stage / Risers / Crew

Upon arrival of **Tudo Azul**, the stage must be clean and ready for setup.

For outdoor events, the stage must also be properly protected from weather conditions by means of a roof, side walls, and a flat, even stage floor.

We do not travel with our own lighting technician and therefore appreciate a skilled and creative lighting engineer who can provide atmospheric lighting for the show.

Summary

We bring:

- Guitars
- Electric bass
- Flute
- Cymbals, bass drum pedal, snare drum, small percussion
- In-ear monitoring system for vocals
- 2 vocal microphones

We need:

- PA system, monitors, mixing console
- 2 microphones for vocals, 1 microphone for flute
- Additional microphones for the remaining instruments depending on stage size
- Amplifiers (electric guitar amp, bass amp, amplifier or monitor for acoustic guitar)
- Piano (preferably grand piano, stage piano also possible)
- Drum kit (bass drum, 2 toms, hardware)

Monitoring (Summary)

For large stages:

- 2–3 wedges + 1 drum fill

Monitor Mixes

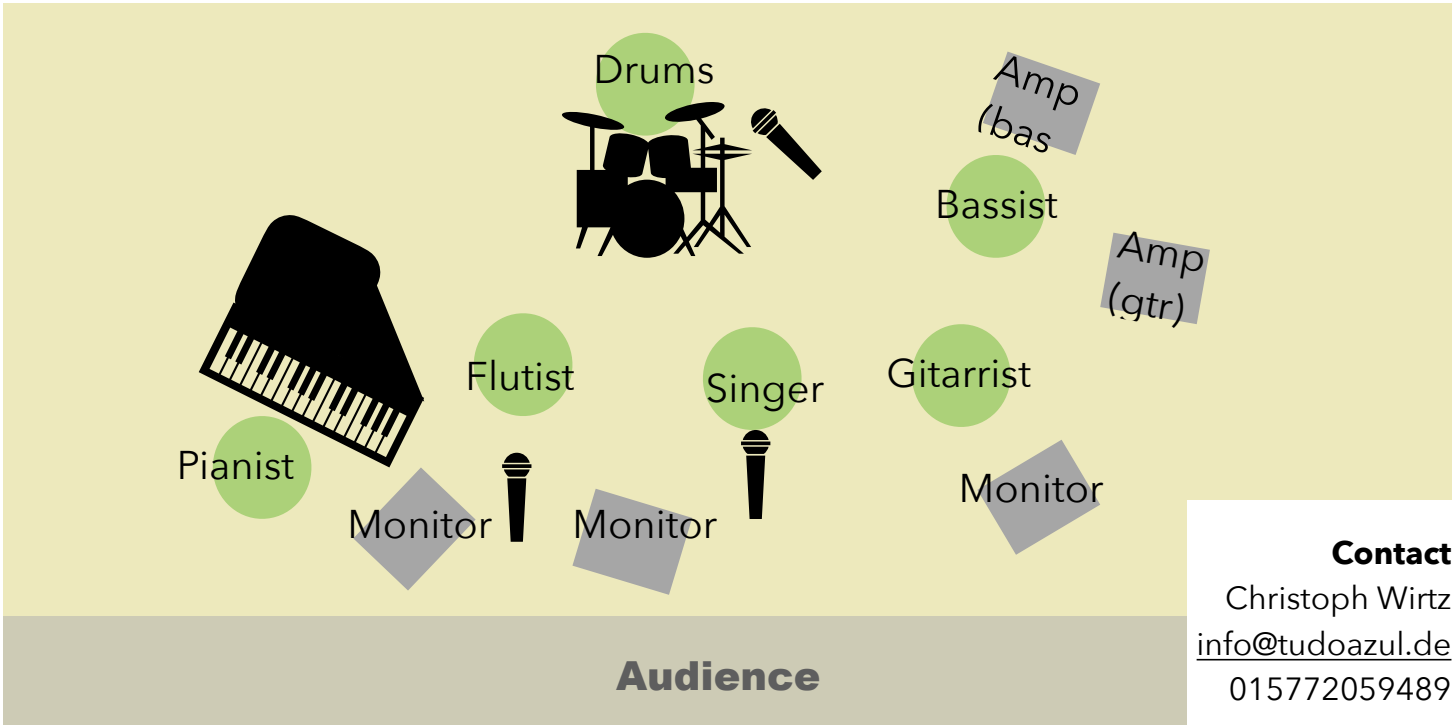

- Mix 1 – Vocals via in-ear monitoring system
  (Xvive U4 Ear Monitor Wireless System with XLR or jack connection)
- Mix 2 – Vocals and flute
  (front of flutist / 1 wedge)
- Mix 3 – Piano
  (center-left / 1 wedge)
- Mix 4 – Guitar
  (center-right / 1 wedge)
- Mix 5 – Drums and bass
  (rear-center / 1 drum fill or wedge)

(All positions from the perspective of the FOH engineer/audience.)

For smaller stages and clubs, two monitors for vocals, flute, and acoustic guitar are often sufficient, plus one monitor mix for the singer’s in-ear monitoring system.

Please contact us if any required equipment cannot be provided.
